Data Appendix

Dataset: movie_posters_100k_controlnet.csv

- A cleaned dataset consisting of 100,000 movies from that past decade with their metadata and the movie poster image.
- The unit of observation is an individual movie.

Column	Description	Example
id	Unique numerical ID of movie	14,836
image	Image of movie poster	
title	Title of movie	”Barbie”
genres	List of genre categories for the movie	[{ "id": 16, "name": "Animation" }, { "id": 10751, "name": "Family" }, { "id": 14, "name": "Fantasy" }]
overview	Synopsis or plot summary of the movie	”A life of an ordinary Parisian…”
popularity	Numerical measure of total popularity of movie	1706.801
release_date	Date indicating date of release	2023-09-21
budget	Numerical measure of final budget set for each movie in USD	291,000,000
revenue	Numerical measure of total revenue earned for each movie in USD	567,148,955
tagline	Promotional tagline of movie	”We all share the same fate.”
original_language	Original language of movie	en
runtime	Duration of movies in minutes	131

image_width	Numerical measure indicating width of movie poster image	500
image_height	Numerical measure indicating height of movie poster image	750
ocr_result_rendered_image	Parsed text from images placed on a clean background for legibility if used in later analysis. Text reconstruction from image to ensure clarity.	
caption	Title of movie with genre categories of each movie	”Title: Spider-Man: No Way Home Genres: Action, Adventure, Science Fiction”
caption_with_overview	Title, genre(s), and overview of each movie	”Title: Spider-Man: No Way Home Genres: Action, Adventure, Science Fiction Overview: Peter Parker is unmasked and no longer able to…”

Dataset: movies_10y_metadata10k.csv

- A cleaned dataset consisting of 10,000 movies from that past decade with their metadata and the file path to the movie poster image.
- The unit of observation is an individual movie.

Column	Description	Example
image_path	File path for image of movie poster	filtered_posters/poster_0.jpg
title	Title of movie	”Barbie”
popularity	Numerical measure of total popularity of movie	1706.801
release_date	Date indicating date of release	2023-09-21
image_height	Numerical measure indicating height of movie poster image	750

image_width	Numerical measure indicating width of movie poster image	500

Dataset: movies_10y_metadata_with_counts_both.csv

- A cleaned dataset consisting of the same information as the data set from above, but with two additional columns indicating person(s) detection count.
- The unit of observation is an individual movie.

Column	Description	Example
image_path	File path for image of movie poster	filtered_posters/poster_0.jpg
title	Title of movie	”Barbie”
popularity	Numerical measure of total popularity of movie	1706.801
release_date	Date indicating date of release	2023-09-21
image_height	Numerical measure indicating height of movie poster image	750
image_width	Numerical measure indicating width of movie poster image	500
person_count_L	Detection of persons result from custom training	2
person_count_UL	Detection of persons result from non-custom training	3
